For someone with known values what is the possibility of having a specific disease?

Known values:

Sex	Race	Age
male	White: British	70

The possibilities of someone with the known values to have a specific disease are as follows:

Disease	Possibility
Arthropathies	25.0 %
Other forms of heart disease	15.625 %
Ischaemic heart diseases	12.5 %
Influenza & pneumonia	9.375 %
Diseases of oesophagus, stomach & duodenum	6.25 %
Cerebrovascular diseases	3.125 %
Chronic lower respiratory diseases	3.125 %
Disorders of lens (including cataracts)	3.125 %
Dorsopathies	3.125 %
In situ & benign neoplasms and others of uncertainty	3.125 %
Malignant neoplasm of digestive organs	3.125 %
Malignant neoplasms of lymphoid, haematopoietic & rel. tiss.	3.125 %
Malignant neoplsm. of thyroid and oth. endo. Glands etc	3.125 %
Other diseases of intestines	3.125 %
Symptoms & signs inv. the digestive system & abdomen	3.125 %

#### Is there someone on the citizens table that we can be certain of their disease?

After querying the hospital able for each citizen the ones that returned only one result are as follows:

Name	Disease
Ada Orozco	Arthropathies
Adam Thomas	Diseases of oesophagus, stomach & duodenum
Adrian Testerman	Symptoms & signs inv. the digestive system & abdomen
Agnes Rankin	Diseases of oral cavity, salivary glands & jaws
Agnes Turner	Symptoms & signs inv. the digestive system & abdomen
